Experiment – 9

Hospital Information System Using Zoho One (SaaS)

Aim

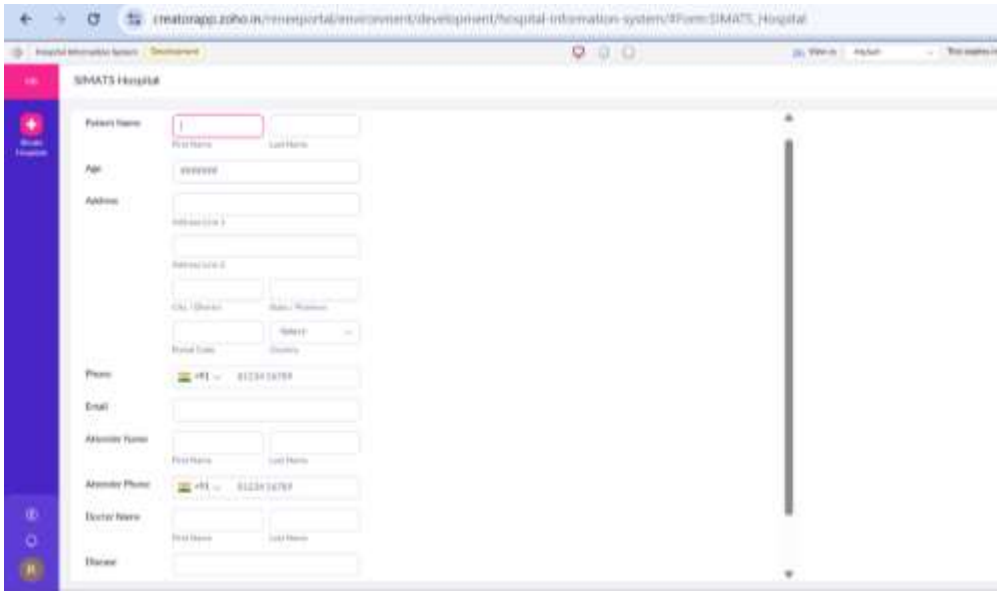

To create a Hospital Information System for SIMATS Hospital using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

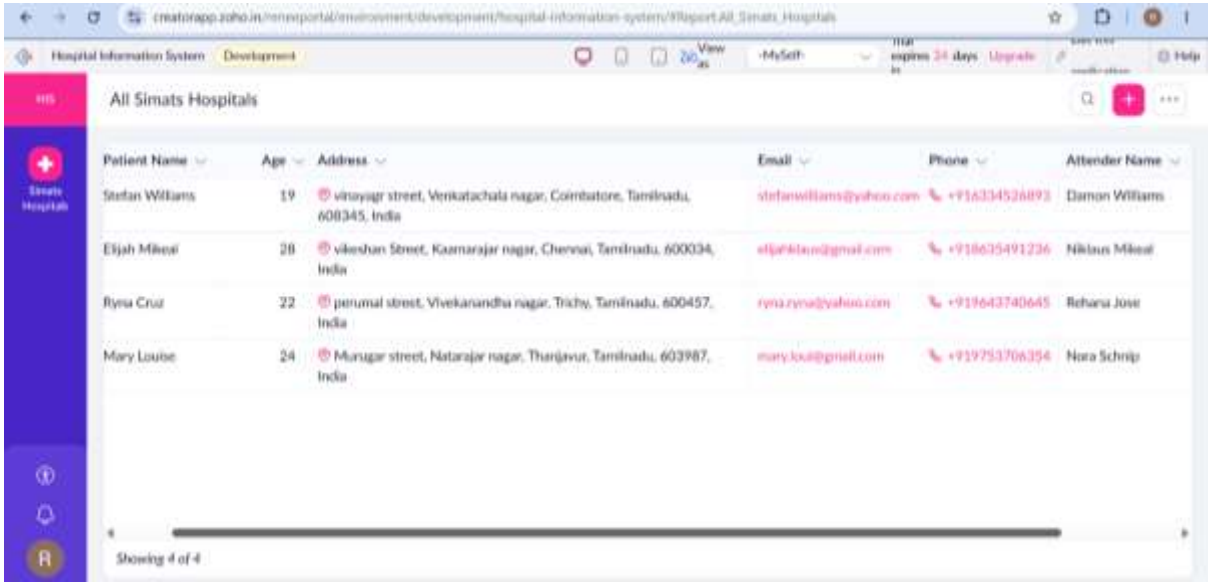

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Hospital Information System.
4. Create a new form named **Hospital Information**.
5. Add the required fields:
    - Patient Name
    - Patient ID
    - Age
    - Gender
    - Address
    - Phone Number
    - Email Address
    - Attender Name
    - Attender Phone Number
    - Doctor Name
    - Department
    - Disease
    - Symptoms
    - Admission Date
    - Discharge Date
    - Treatment Status (Admitted / Discharged)
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.

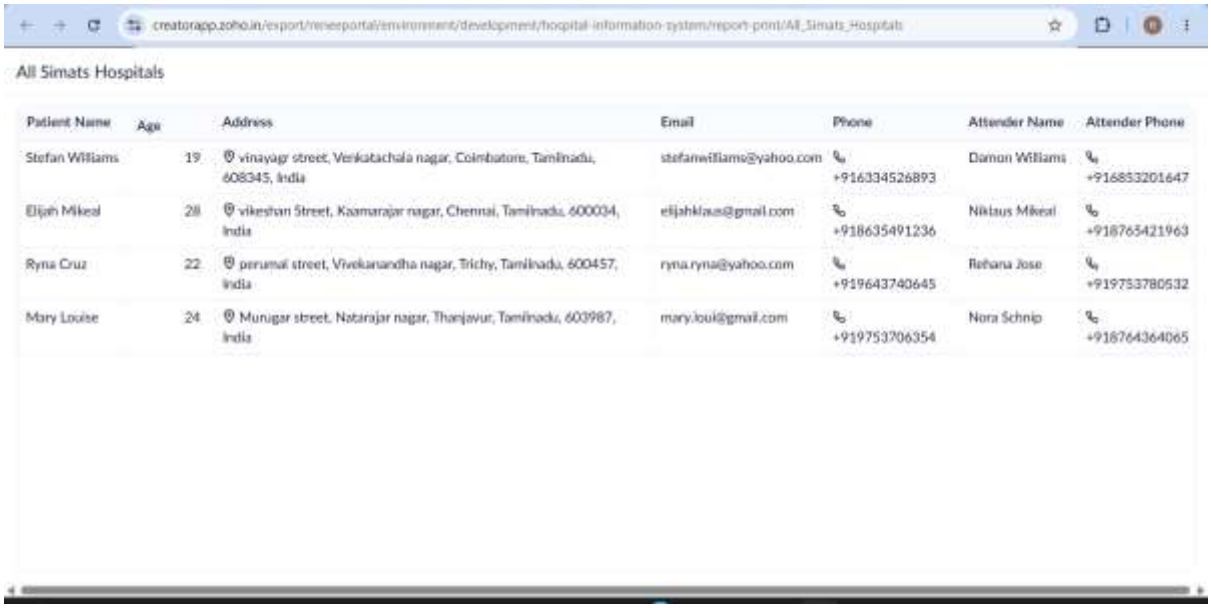

8. Save and publish the form.
9. Enter sample patient details and hospital information into the form.
10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application by entering different patient details, doctor information, and disease records.
12. Verify that the Hospital Information System works successfully as a SaaS application.

Input

Output

All Simats Hospitals

Patient Name	Age	Address	Email	Phone	Attender Name	Attender Phone
Stefan Williams	19	vinayagr street, Venkatachala nagar, Coimbatore, Tamilnadu, 608345, India	stefanwilliams@yahoo.com	+916334526893	Damon Williams	+916853201647
Elijah Mikeal	28	vikeshan Street, Kaamarajar nagar, Chennai, Tamilnadu, 600034, India	elijahklaus@gmail.com	+918635491236	Niklaus Mikeal	+918765421963
Ryna Cruz	22	perumal street, Vivekanandha nagar, Trichy, Tamilnadu, 600457, India	ryna.ryna@yahoo.com	+919643740645	Rehana Jose	+919753780532
