

Experiment -3

Aim

To create an Appointment Booking System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

- Log in to the **Zoho One** cloud platform.
- Open **Zoho Creator** from the Zoho One applications.
- Create a new application for the **Appointment Booking System**.
- Create a new form named **Appointment Booking**.
- Add the required fields:
 - Patient/Customer Name
 - Phone Number
 - Email
 - Appointment Date
 - Appointment Time
 - Service/Appointment Type
 - Doctor/Staff Name
 - Appointment Status
 - Remarks
- Configure the field types according to the data required.
- Design and arrange the form for easy user interaction.
- Save and publish the form.
- Enter sample appointment details into the form.
- Submit the form and verify that the entered data is stored in the cloud.
- Test the application by entering different appointment details.
- Verify that the **Appointment Booking System** works successfully as a SaaS application.
