Experiment – 6

Payroll Processing System Using Zoho One (SaaS)

Aim

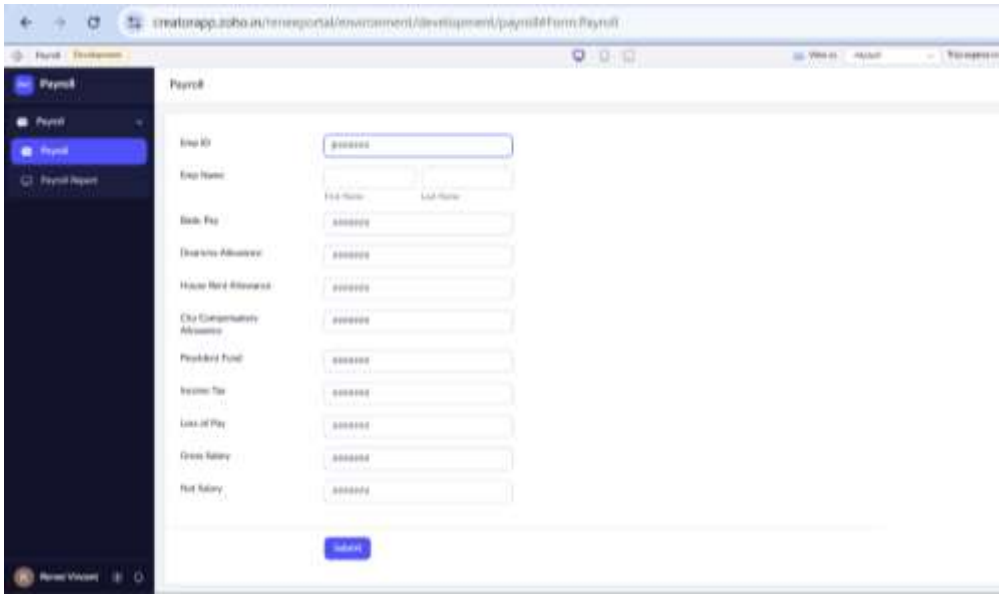

To create a Payroll Processing System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

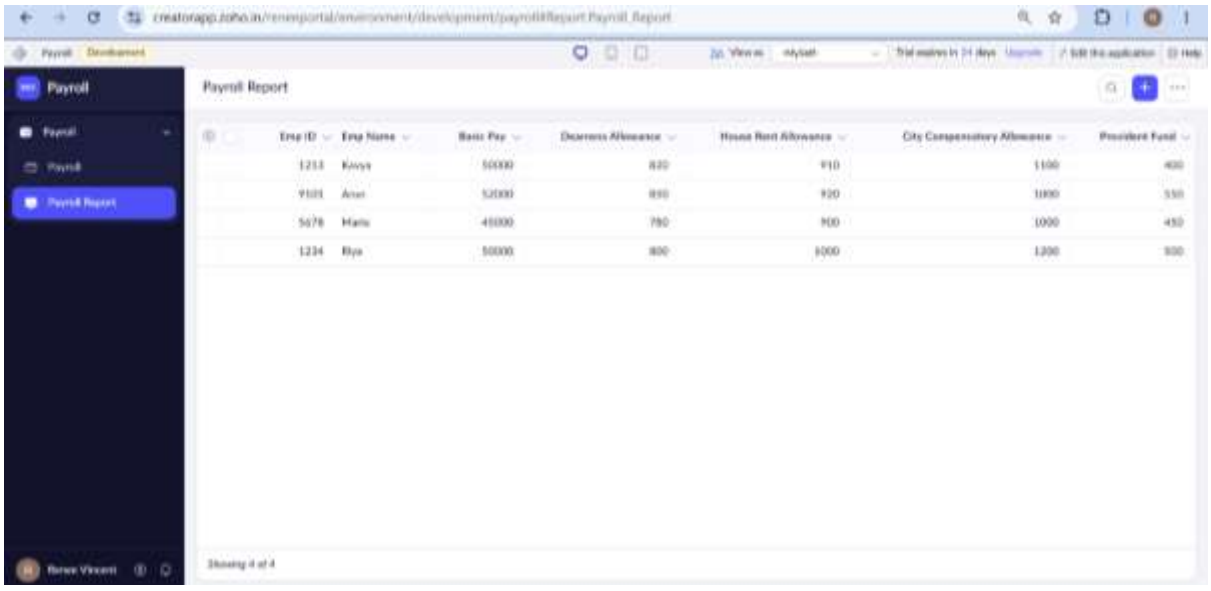

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Payroll Processing System.
4. Create a new form named **Payroll Processing**.
5. Add the required fields:
    - Employee Name
    - Employee ID
    - Department
    - Designation
    - Experience in Present Organization
    - Overall Experience
    - Basic Pay
    - House Rent Allowance (HRA)
    - Dearness Allowance (DA)
    - Travel Allowance (TA)
    - Other Allowances
    - Gross Pay
    - Deductions
    - Net Pay
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Configure calculations to determine gross pay by adding basic pay and allowances, and net pay by subtracting deductions from gross pay.

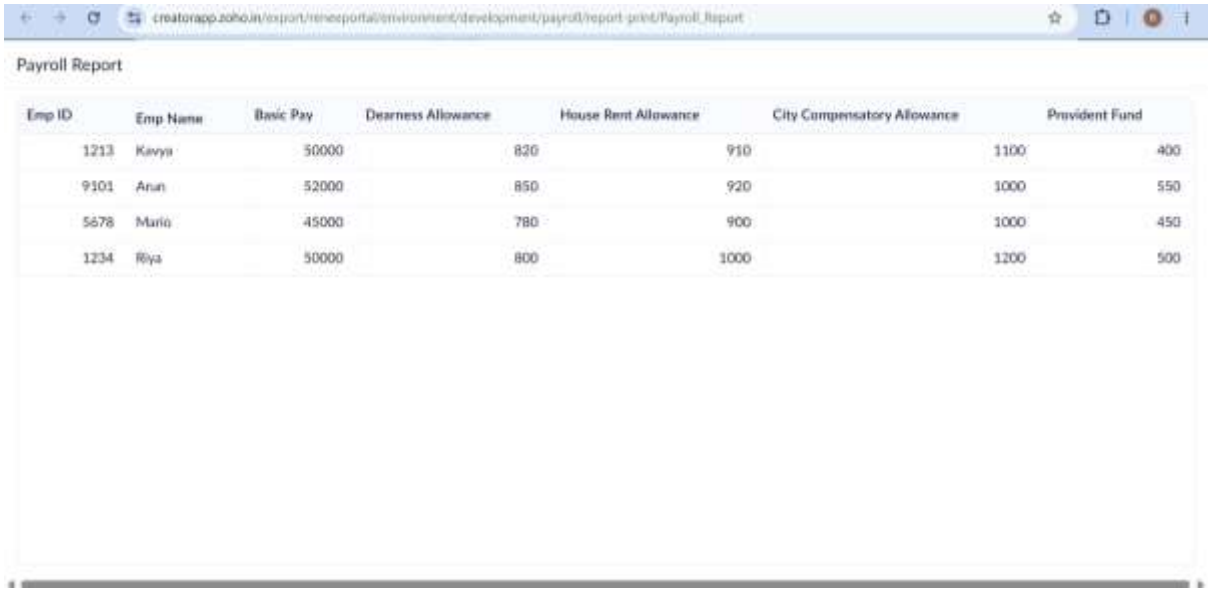

9. Save and publish the form.
10. Enter sample employee details and salary information into the form.
11. Submit the form and verify that the entered data is stored in the cloud.
12. Test the application by entering different employee details and verifying the gross pay and net pay calculations.
13. Verify that the Payroll Processing System works successfully as a SaaS application.

Input

Output

Payroll Report

Emp ID	Emp Name	Basic Pay	Dearness Allowance	House Rent Allowance	City Compensatory Allowance	Provident Fund
1213	Kavya	50000	820	910	1100	400
9101	Arun	52000	850	920	1000	550
5678	Mario	45000	780	900	1000	450
1234	Riya	50000	800	1000	1200	500

Result

Thus, a Payroll Processing System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
